

Indoor-outdoor living in Montréal, Québec

This **Impact Award**-winning "West Island" home's pristine outdoor living space is perfect for entertaining

"Phantom Screens offers a wide range of colors and mesh - as well as the ability to recess the screens into the structure. With all the choices offered, we knew we would find the perfect product for our customer."

- Jean Houde Prestige Construction Inc.

- LOCATION:** Montréal, Québec
- STYLE:** Modern / International
- ARCHITECT:** Jean Houde Prestige Construction, Inc.
- PRODUCT:** Phantom's motorized wall screens
- NEED:** This sprawling outdoor living space needed the ability to open to the home's incredible lake view providing easy access to the pool - without compromising the architecture of the home or leaving guests vulnerable to insects.
- SOLUTION:** Phantom's motorized screens were chosen because they would recess flawlessly into the columns - blending with the home's modern design. At the touch of a button, the screens disappear and offer uncompromised views.

OVERVIEW

Jean Houde Prestige Construction's "West Island Home" was chosen as Phantom's 2017 Impact Award winner because of its superior design and innovative integration of Phantom Screens. Motorized screens were installed over the home's expansive multi-panel sliding door and patio area, creating the perfect indoor-outdoor space while seamlessly integrating with the structure's clean lines and modern aesthetic.

The retractable screens allow guests to enjoy fresh air from the water's edge and take in the breathtaking views - without worrying about bothersome insects. This spacious, multi-purpose indoor-outdoor area is ideal for hosting large parties through the evening - while still cozy enough for a couple or family to relax and take in the lake views year-round.

APPLICATION HIGHLIGHTS

Enjoy the breeze without the bugs

Phantom's screens create a seamless blend between indoor and outdoor living - allowing you to enjoy fresh air and a cool breeze without the bugs.

Expand your living space

The addition of Phantom Screens expands your home's footprint - providing more space for entertaining large groups or enjoying the outdoors, but with the protection and comfort of the indoors.

Complements any space

Phantom's motorized screens retract into cavities designed above the openings, completely hiding them from view and blending perfectly with the home's architectural design.

PRODUCT FAST FACTS

- Completely recessed into cavities so housing is never visible
- Fits openings up to 40-ft wide
- Allows for integration with home automation systems and smartphone & tablet devices
- Somfy®'s new Maestria® motor automatically stops the screen if impeded while being lowered to reduce the risk of damage
- Installed by factory trained professionals
