Phantom's window, door and motorized screens bring a heritage home to life in Mobile, AL

“They blend seamlessly in with the window and not detract from the beauty so we were able to preserve the old look and feel of the window yet add in the modern convenience of a retractable screen.”

*– Esther de Wolde
CEO, Phantom Screens*

- LOCATION:** Mobile, Alabama, USA
- PRODUCT:** Retractable doors, windows and motorized screens by Phantom®
- NEED:** As part of this historic home renovation, the designers wanted to open all of the living spaces to the outdoors without taking away from the traditional design. In order to do this, they needed to find a way to keep out unwanted bugs and debris.
- SOLUTION:** Phantom's screens were installed on each of the home's windows and doors and also enclosed the back porch. Now the homeowners can comfortably enjoy their outdoor living space year round and a cool breeze can flow easily throughout the entire home.

OVERVIEW

This 1906 single floor bungalow in Mobile, Alabama was restored to showcase Phantom's window, door and motorized screens. They wanted to bring together the home's indoor and outdoor living space and make it comfortable year round in Alabama's changing climate.

Phantom's screens were added to each window and door, allowing homeowners to control the sunlight and breeze that enters the indoor and outdoor living spaces without letting in bugs or debris. It was even possible to turn the porch into an 'inside room' contained from the elements, by lowering Phantom's clear vinyl motorized screens. The screens blend in seamlessly with heritage home's design and can be easily retracted out of sight when not in use.

APPLICATION HIGHLIGHTS

Enjoy the breeze without the bugs

Phantom's screens are able to let in the breeze without having to worry about pesky insects.

Easy operation with secure closure

The retractable door screens' integrated latch and release handle is durable and easy to use. It closes the screen securely to prevent accidental opening in breezy conditions.

Complements any home

Phantom's motorized screens retract into cavities designed above the openings, completely hiding them from view. This way the screens don't distract from the design of the home.
